

## The University of Limoges is recruiting a

### Digital Education Engineer EUPeace project

*Contractual equivalent to catégorie A*

**Ref : 2024-1642512**

#### Presentation of the University of Limoges

Founded in 1968, the University of Limoges is a local university on a human scale, training over 16,000 students and employing more than 1,800 permanent staff.

At the heart of Europe, it is a major multi-disciplinary centre of higher education, in an environment that is highly conducive to scientific development. Open to all, it is a hub of interaction, with a diverse student population, efficient reception facilities, close-knit teams and courses based on top-level research with clearly identified career prospects. Its scientific excellence, with cutting-edge laboratories and far-reaching partnerships, is helping to invent the world of tomorrow. The University of Limoges is very active in the field of international cooperation. It is very active in the field of international cooperation, with a rapidly expanding European Projects Engineering Platform.

The present recruitment is part of the EUPeace European project funded by Erasmus+, submitted in the framework of the Alliance of European Universities created around peace, justice and social inclusion. Coordinated by Germany's Philipps Universität in Marburg, it brings together 9 institutions from 7 European countries (Germany, France, Spain, Italy, the Czech Republic, Bosnia and Turkey). Aimed at the entire university community (students, teaching staff, researchers and administrative staff), the project will create learning frameworks enhancing Peace, Justice and Inclusive Societies to train a new generation of students promoting tolerance, diversity and pluralism. It will offer opportunities for the co-creation of knowledge and will strengthen the capacity of institutions to directly serve European societies.

#### Job location

Université de Limoges  
**Pôle International**  
Campus de VANTEAUX  
39 H rue Camille Guerin  
87036 LIMOGES

#### Mission

Reporting to the University's International Office, you will design and implement digital training systems, support teaching teams and develop and deploy digital environments tailored to the various audiences welcomed by the University of Limoges as part of the EUPeace Project.

Working closely with the EUPeace teams at the University of Limoges and its partner universities in the EUPeace Alliance, your main task will be to provide day-to-day technical and pedagogical support to the players involved in innovative, hybrid and distance learning courses. In particular, you will be responsible for

- *supporting the EUPeace Project in implementing digital teaching methods;*
- *day-to-day management of the EUPeace Project's distance learning courses;*
- *support for teaching and support staff;*
- *deployment and management of application platforms and servers, as well as dedicated software.*

#### YOUR MAIN ACTIVITIES:

- ➔ **Supporting the project in implementing the use of digital teaching methods, in particular open and distance learning.** You will take part in regular meetings of the EUPeace Project within the University

and with EUPeace partners; you will draw on the expertise of the University's pre-existing virtual campuses; and you will configure the dedicated digital tools.

- ➔ **Ensure the implementation, administration, management and day-to-day technical and pedagogical monitoring of the EUPeace Project's training courses**, in particular **teaching courses (WP3)**, future **European Track modules** and EUPeace training courses in international partnerships. This will involve coordinating and leading teaching activities, organising training logistics, monitoring and developing course modules, and managing specific training periods (applications, enrolments, organising and monitoring examination sessions and make-up sessions, jury panels, etc.).
- ➔ **Provide support for EUPeace teachers and support staff in the use of digital teaching methods**: day-to-day teaching and technical assistance; design, production and implementation of teaching resources and activities; interface between technical and teaching teams in the design, scripting and implementation of innovative training systems.
- ➔ **Provide training, awareness-raising and documentation on the use of digital teaching aids for teachers, staff and users of the project**, particularly as part of the activities of the EUPeace Teaching Staff Academy and the EUPeace Summer Schools; to contribute to the dissemination and promotion of digital teaching initiatives and practices in the school and EUPeace project partners.
- ➔ **Set up, administer and manage application servers and specific software** dedicated to training courses in connection with the pre-existing virtual campuses. Provide daily support for users of the application servers and set up advisory and training activities.
- ➔ **Ensure**, in collaboration with the IT Department, **the implementation and management of training platforms (UNILIM and EUPeace partners) and digital teaching support tools**. Technical and pedagogical administration and management of course spaces and registrations on the Communities platforms.

## Profile

### THE PROFILE WE ARE LOOKING FOR:

With several years' successful experience in digital educational engineering, you are familiar with the workings of higher education, research and innovation and ideally have already worked in an international environment.

You are familiar with techniques for mediating educational content and learning processes in the educational sciences. You have a detailed knowledge of web and multimedia development technologies, content management tools and interoperability issues.

You are able to work independently in a threefold expert, user and international environment. You will be able to analyse requirements, develop tools tailored to projects, take part in technology watch on digital tools, and provide support, advice and training.

You are fluent in French and English (spoken and written - level B2 CERL).
